
Pump User Question

Posted by InfoRich - 2008/07/29 13:58

Hi guys,

I'm doing a little market research, and was hoping to get a few answers...

1. Do you have any experience with non-metallic wear rings/throat bushings? How did they work?
2. Did you do the repairs in-house or a pump repair shop.
3. What is the most importantn determining a good pump: Efficiency? MTBR? Run Dry capability? Other?

Thanks a lot!!!

-Rich
